DETAILED ACTION

The amendment filed on January 29, 2002 (paper No. 5) has been received and considered. By this amendment, claims 3 and 5 have been canceled, and claims 1-2, 4 and 6-7 are pending in the application.

Specification

The use of the legal phraseology "said" in the abstract, line 2, should be avoided.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jaffe (US. Patent No. 6,254,481).

As per claim 1 and 4, Jaffe discloses a gaming device which comprises: wager accepting means 18 (Fig. 2); a display 14 (Fig. 2); means 20 (Fig. 2) for operating the display and the wager accepting means (col. 4, lines 41-49); a primary game having particular outcomes (col. 4, lines 1-11); first bonus game being accessed via particular outcomes on the primary game (col. 5, lines

63-65); and a second bonus game (col. 8, lines 38-40). The first bonus game includes an outcome as a path to play the second bonus game (col. 8, lines 40-43).

Jaffe does not disclose the second bonus game being accessed via particular outcomes of the primary game. However, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to provide a function call which activates the second bonus game of Jaffe when the primary game has a particular outcome that triggers the second bonus game. The motivation for implementing the function call is to provide the player more chances to play a variety bonus games from the outcomes of the primary game.

Allowable Subject Matter

2. Claims 2, and 6-7 are allowed.

Response to Arguments

3. Applicant's arguments filed January 29, 2002 have been fully considered but they are not persuasive.

In response to applicant's argument in page 5, first paragraph, examiner admits that Jaffe does not explicitly disclose accessing the second bonus game directly from the primary game. However, Jaffe discloses accessing the first bonus game directly from the primary game (col. 5, lines 63-65), since the second bonus game is, in fact, just one of a bonus game executed after a previous game completed, an ordinary person skilled in the art at the time the invention was

made could be able to use the driver software that executes the first bonus game from the primary game to execute the second bonus game directly from the primary game.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any response to this final action should be mailed to:
